

Economics Is Everywhere Game

In this game, you will examine photographs to identify examples of economic concepts. For each round, write the economic concept in the blank. In **Rounds 1 and 2**, record three examples of that economic concept. In **Round 3**, circle the letter that represents the decision, opportunity cost, and tradeoff for each matching placard. In **Round 4**, complete the prompt in the corresponding box. After each round, record the points your pair earned in the “Scoring” section.
